

How Elios supports clients

Strategy. Specialists. Solutions.

We set AI strategy, deploy specialists, and deliver solutions. Match the support to your business priority, and combine what you need.

Strategy

Decide where to invest and how to proceed.

- AI priorities and business case
- Workflow, data readiness, and governance
- Delivery roadmap and technology direction
- You own the decisions; Elios guides them

Specialists

Add the expertise your team needs.

- Strategy, engineering, and data expertise
- Individually or in a scoped combination
- Your team directs delivery
- Matched to your work through Elios Insights

Solutions

Have Elios lead agreed solution delivery.

- Agreed scope and acceptance criteria
- Build, integrate, and release
- Prepare users and operating owners
- Improve adoption and results

Who leads delivery

Specialists · Client-led

Your team leads delivery and owns the outcome. Elios adds the expertise you need.

Solutions · Elios-led

Elios leads against agreed scope and acceptance criteria. Your team sets priorities and approves outcomes.

Across your AI journey

Ignite

Align

Activate

Amplify

Any offer can support any stage. Engage Strategy on its own or alongside Specialists and Solutions, and combine the support you need.

AI fluency sits alongside any offer, or on its own: practical AI skills for business and technical teams.

The AI Journey

We meet you where you are in your AI journey.

Start at any stage. These are not fixed packages or mandatory steps: Intake agrees the need, the starting point, and who leads, and the engagement determines the scope.

PHASE	HOW IT WORKS	WHAT YOU GET
 Ignite Explore AI opportunities	• AI Labs: hands-on exploration of business challenges with leaders and teams • A focused prototype or experiment to test whether an idea warrants investment	• Relevant use cases tied to business needs • Findings from exploration or testing • A recommended next step: explore further, plan delivery, or stop
 Align Define your AI strategy	• Compare benefits, costs, risks, and alternatives for each investment • Assess people, process, data, technology, and governance together	• Investment priorities and a business case • A delivery roadmap • Direction on technology, data readiness, governance, and team needs
 Activate Build and implement	• Elios leads delivery within agreed scope and acceptance criteria • Software tests and AI evaluations throughout; release in working increments	• A working, integrated solution within agreed scope • Named operating owners and support responsibilities • Performance measures for quality, cost, and value
 Amplify Improve, adopt, and scale	• Assess business performance alongside quality and adoption • Resolve adoption barriers and expand proven workflows	• A prioritized improvement plan • Tested changes and adoption support • A plan to sustain and expand what works

Talk with Elios.

Bring your priority, current plans, and constraints to an Intake conversation.
